

Disasters

Prepare and Respond

A resource manual developed
by Province IV of the Episcopal Church

Published Lent 2009

“

I am deeply gratified

by the excellent work that has gone into this manual. In light of the natural disasters that many have faced in recent years, it is crucial that we all become better prepared to offer pastoral and emotional support to one another. This manual, the result of considerable shared research and practical experience, is not only a helpful tool for Province IV dioceses and congregations, but a model for all the church.

”
